

Consul™

Smart Locker Solutions

Welcome to LapSafe®

Storage, Charging & Smart Locker Experts

LapSafe® is the original inventor of storage and charging trolley and has 25 years of proven innovation in the smart locker industry.

As pioneers in this space, we've been driving advancements longer and more effectively than any other provider. Our extensive experience makes us the most reliable choice for smart locker storage and charging solutions, consistently setting the standard for security, efficiency, and innovation.

“ It's more than lockers, it's a new way of thinking about access, control and sustainability. ”
- Ayrshire College

Consul™

Smart Locker for Self-Service Device Loaning

Transform the way your organisation manages devices and supports users, with device loaning.

“ The smart lockers are quicker and more convenient; It's about offering flexibility.

- RDaSH

The Consul™ Smart Locker provides a seamless self-service device loaning experience, allowing organisations to automate IT asset loaning while maintaining security and efficiency.

Powered by ONARKEN®, Consul™ enables self-service access to laptops, Chromebooks, and tablets, making it an ideal solution for educational and work environments looking to simplify device management.

Smart Locker Services

Device Loaning:

Users can easily borrow and return devices without staff intervention.

Smart Charging:

Our unique smart charging and intelligent power management ensure devices are charged and ready for use. See page 12 for more information.

ONARKEN®:

Our cloud-based software integrates with LMS systems, Entra, AD, and more.

Secure Storage:

Study steel construction with robust locking mechanisms.

The Power of Consul™ Smart Lockers

Time Based Deployment

When a user requests to borrow a device, the system will only issue devices that have been charging for a set period. This means the user will always receive a device ready to use.

Increases User Access

24x7 Self-service access to assets, allowing users to borrow, or return equipment even outside of office hours.

Maximise Utilisation

Increasing the availability of loanable devices maximises your existing resources, significantly reducing the number of devices required and increasing utilisation.

Improves Sustainability

Smart energy management reduces energy waste and optimises power usage. Power is automatically turned off when devices are fully charged, and power-saving reports show cost savings in real time.

Reduce Admin Workload

Automate asset distribution, reducing workload for staff. Make management simpler with automated notifications and run audits and reports with real time data.

Remote Management

Manage your whole digital estate remotely with our ONARKEN® cloud based platform. Integrates with various systems including Library Management Systems, Entra, AD and more.

Smart Charging & Power Management

SmartLine™

Our SmartLine™ charging is configured to the exact make and model of your device. All devices are charged simultaneously in the fastest possible time. Supporting power delivery for USB-C up to 90W per channel or traditional low voltage tips.

PowaSave™

Our PowaSave™ feature saves energy costs and reduces your carbon footprint. The system automatically turns off our power supplies when devices are fully charged and power scheduling allows you to set charging hours to ensure the unit is only powered when needed.

Networking & Connectivity

Updates can be carried out on devices in-situ using Wake on LAN (WoL) with our optional Data Transfer solutions. Switches and structured cabling are provided to connect devices to your network. When using our SmartLine™ USB-C charging, data can also be delivered through the same USB-C cable, making it quick and simple to connect devices to your network for updates.

*Windows Modern Standby can prevent attached USB-C network devices waking up your laptop to instigate any data transfer or updates. Please consult with your laptop manufacturer or your Lapsafe® Account Manager for more information.

Our Unique Smart Charging Features

✔ Time Based Deployment

When a user goes to borrow a device, the system will only deploy devices that have been charging for a set period of time. This means the user will always get a device that is ready to use.

✔ Charged Based Return

Make sure the device is correctly reconnected for charging, and the locker door is securely closed—this confirms the return. If either step is missed, the item will remain recorded as on loan. This simple process enables true self-service and keeps operations running smoothly without staff input.

✔ Correct Item Check

When used with supported USB-C devices, the system automatically verifies that the right device has been returned and connected for charging based on its make and model.

✔ Optimal Charge Temperature

Our integrated power management system continuously monitors internal locker temperatures, activating cooling fans only when required to maintain optimal airflow. If temperatures exceed a safe threshold, the system will automatically cut power to protect devices from overheating.

ONARKEN®

Smart Locker Management Platform

ONARKEN® is the intelligent cloud-based platform that powers all LapSafe® Smart Lockers. Bringing together every service, function, and user interaction into one powerful, easy-to-manage system.

Designed in-house by our expert development team, ONARKEN® gives you full control over your entire smart locker estate from one centralised platform.

Whether you're managing hundreds of devices, multiple sites, or a variety of services, ONARKEN® keeps everything connected, streamlined, and secure.

Every feature is purpose-built to make smart locker management smarter

Everything in One Place

Manage all your lockers, services, users, and assets in one platform, no switching between tools or systems.

Granular Control

Set precise rules for who can access what, when, and how. Assign user roles, define permissions, and create tailored workflows that fit your organisation.

Powerful Automation

ONARKEN® automates loaning, collections, returns, alerts, and more. Reducing admin while increasing efficiency and accountability.

On-Demand Access Management

Create single-use codes, timed PINs or contactless entry methods for specific users or scenarios — ideal for temporary access or one time collections.

Service Management Made Simple

Run multiple services from the same locker — from IT asset loaning to service desk swaps, drop-off and collect, and hot locker use. ONARKEN® keeps everything running smoothly.

Reporting & Insights

Access real-time usage data, power consumption stats, and user behaviour reports to inform decisions, prove ROI, and support your carbon reduction goals.

With ONARKEN®, your lockers become part of an integrated system that's easy to use, endlessly configurable, and built to grow with your organisation.

See our ONARKEN® brochure for full details or talk to our team

Integrations Optimising Your Organisation

Every organisation relies on a connected ecosystem of platforms from asset management and booking systems to learning management systems (LMS). Without the right integrations, organisations face duplicated data, reduced visibility, and inefficient manual processes.

LMS & platform integrations:

Connect seamlessly with your learning management system and existing platforms to support device loaning programmes, course delivery, and user engagement.

Open APIs for smarter ecosystems:

Easily integrate with your existing tools to create a fully connected environment that supports device access, tracking, and automation.

Full control over users, assets, and lockers

Manage device loans, bookings, and availability in real time, directly through your existing systems.

Device loaning aligned with your operations

Enable seamless device lending and returns by integrating ONARKEN® with booking systems, LMS platforms, or campus management tools.

Streamlined workflows and automation

Reduce manual administration by automating device allocation, tracking, and user access – ensuring devices are always in the right place at the right time..

Data-driven insights and reporting

Gain a complete view of device usage, availability, and performance. Use real-time data to optimise your device loaning strategy and improve resource planning.

Some Of Our Popular Integrations Via Our APIs

Locker Configurations & Options

Locker Configurations:

Width Options: Standard 516mm perfect for laptops, Chromebooks and tablets.

Door Configurations: 10 locker bays.

Screen Terminal: Control tower with 19" touch screen and 5 locker bays..

Locker Dimensions

	Width	Depth	Height
Standard	516mm	450mm	1633mm

Bay Dimensions

	Width	Depth	Height
5 Bay Terminal	413mm	445mm	97mm
10 Bay Terminal	413mm	445mm	97mm

Customisation:

Fully customisable with a wide range of colours to suit your organisation's theme or branding.

Customise the screen graphics and messaging to support your needs.

Authentication Methods:

Supports RFID, barcode, biometric, PIN, and QR code login.

Charging & Network:

A range of charging options and network connectivity. for more information visit: lapsafe.com

Consul™
Customisable Smart Lockers

A selection of the most popular colours used by our customers

LapSafe® : A British Manufacturer

Made in Britain

LapSafe® manufactures its products in the UK, and supports local business whenever possible.

We are members of 'Made in Britain' an organisation that promotes creativity, ambitious standards, and sustainable growth to the world.

Our UK Based Teams

We install, support, and deliver our products ourselves to ensure that our customers receive the best attention throughout their purchase and afterwards.

When we sell through our selected partners, we remain the contact for service and support to ensure our end users always receive our best service.

Sustainable Construction

The Consul™ is built from responsibly sourced recycled steel. All our products are built to the highest quality standards, designed to stand the test of time

A Smart & Sustainable Choice

- UK Designed & Manufactured
- Energy-Efficient Smart Charging
- Long Lasting, Scalable & Future Proof Solutions
- Positive Environmental Impacts
- Working With You To Meet Carbon Zero Targets

Sustainability & Future Proofing

Advanced Power Protection

Soft start, surge protection, and residual voltage control ensure the safety of devices, users, and lockers.

Smart Charging

Intelligently manages power distribution, turning power on and off as needed. See pg 12

Energy-Efficient Power Management

Reduces wasted energy with smart charging and power scheduling.

Built from Recycled Steel

High-quality construction with sustainably sourced materials.

Built for Longevity

A future-proof, sustainable solution, designed to last with high-quality materials.

Plant A Tree

Each purchase supports our Plant-A-Tree initiative. See pg 24

Made in Britain

A registered 'Made in Britain' company.

Warranty

For complete peace of mind, LapSafe® offers extensive warranty.

Support

Our UK based support team is happy to help with your queries.

Planting Trees With Every Product

Plant-a-Tree

As part of our commitment to sustainability, LapSafe® will plant one tree for every trolley, locker tower or vending machine you buy.

Why It Matters

The UK needs to plant 1.5 billion trees by 2050 to meet legally binding net-zero targets.

By choosing LapSafe® you're not just investing in quality, future-proof technology, you're also making a measurable impact on the environment.

Supporting Our Customers

We'll keep track of how many trees are planted on your behalf and share updates as the project grows; Supporting biodiversity, cleaner air, and carbon capture. Helping you and your organisation reduce your carbon footprint.

Our Partners: Time4Trees

Led by land restoration specialists, Time4Trees turns underused and damaged land into thriving forests.

Their mission is to restore nature, improve air quality, and help the UK meet it's climate goals, tree by tree.

“ We're proud to support British reforestation and help restore biodiversity.

Giving our customers a simple but meaningful way to contribute to a more sustainable future with every purchase. ”

Denise Crouch, Marketing Director

LapSafe® Support

Here for you every step of the way
