

Welcome to LapSafe®

Storage, Charging & Smart Locker Experts

LapSafe® is the original inventor of storage and charging trolleys and has 25 years of proven innovation in the smart locker industry.

As pioneers in this space, we've been driving advancements longer and more effectively than any other provider.

Our extensive experience makes us the most reliable choice for smart locker storage and charging solutions, consistently setting the standard for security, efficiency, and innovation.

“ I chose LapSafe® after conducting some research and consulting with our internal Workspace team, who were familiar with them as a reputable vendor. ”

SoftCat

Smart-V™

Smart Vending Machine for IT Peripherals & Workplace Consumables

Manage and distribute physical items
anytime, day or night.

Designed to support smooth, uninterrupted
operations, it ensures that business-critical
resources are always readily available when
and where needed.

Our Smart Vending Machines are purpose-built
to issue a wide range of equipment, including
keyboards, headsets, charging cables, mice,
webcams, PPE, medical supplies and much more.

With 24/7 self-service access, users can collect
what they need in seconds, with no delays, no
IT desk queues.

Powered by ONARKEN®, our cloud-based
software, Smart-V™, gives you full control
over asset disruptions, stock control, and
user access.

This smart, automated solution reduces
administrative burden, increases accountability,
and helps streamline workflows so your teams
stay productive and focused.

The Power of Smart-V™

Eliminates Manual Distribution:

Users can collect IT peripherals & office consumables instantly without waiting for IT or admin staff.

Minimises Downtime:

Employees get the items they need ASAP, reducing workflow interruptions.

Saves Time & Resources:

Reduces time spent manually handing out small items or managing physical stock rooms.

Prevents Unnecessary Spending:

Ensures controlled allocation & budgeting for individuals and departments, helping businesses track usage trends.

Supports Multi-Location Businesses:

Easily deployed across multiple office locations, with centralised management.

Integrated Workflows:

Powered by ONARKEN®, complete with integrations and remotely managed workflows.

Who Uses Smart Vending

Smart Vending systems are utilised across a wide range of sectors, particularly in environments where fast, secure access to essential equipment is crucial. By removing the need for staffed distribution points and manual stock control, these solutions improve efficiency, reduce downtime, and support better accountability.

In educational settings and workplaces, Smart Vending stations provide IT peripherals on demand, helping students and employees collect what they need at any time. This relieves pressure on IT support teams and minimises disruptions to daily workflows.

Healthcare providers, including hospitals, clinics, and emergency services, also benefit greatly. With Smart Vending, critical medical equipment, PPE, and IT accessories are always readily available, ensuring frontline staff have what they require without delays, approvals, or stock shortages. Automating distribution and stock control reduces reliance on staffed issue points, improves efficiency, and ensures items are always available when needed. From universities and offices to hospitals and emergency services, Smart Vending helps keep people equipped, productive, and supported around the clock.

Putting Smart Vending into Action

I Want To...

Reduce IT site visits for IT items

Smart Vending enables remote equipment distribution. Assets can be securely stored, and users can collect what they need quickly, without IT teams having to respond to tickets and allocate time.

I Want To...

Provide 24/7 access

Users can access the equipment they need anytime without relying on staff availability. The system ensures secure, controlled access around the clock. This improves productivity and supports flexible working environments without compromising security or control.

I Want To...

Remotely manage stock resources

Gain real-time insights into stock levels and usage trends, all from one central dashboard. ONARKEN® tracks every transaction and ensures accountability, giving you full control over stock without manual logging or paperwork.

I Want To...

Manage costs and budgets efficiently

Administrators can allocate costs to specific individuals or departments, apply spend limits, and require administrative approval before releasing any stock.

The Smart in Smart-V™

Monitor Stock

Instantly check the availability of specific equipment through ONARKEN®, ensuring efficient planning and allocation of resources.

Benefits: Real-time stock visibility helps avoid shortages and over-ordering, streamlines resource planning and supports better decision-making, reduces manual stock checks and improves operational efficiency, ensures the right equipment is always available when needed, and supports automated replenishment workflows for critical items.

Spend Limits

Set limits on the number of products that can be vended by a user within a custom time frame. This functionality can be configured on a per-product basis, ensuring that more expensive or limited-availability items are controlled more strictly.

Benefits: Maintain tighter control over inventory usage, reducing unnecessary or excessive withdrawals and ensuring critical or high-value items remain available when truly needed. By restricting access based on user roles or timeframes, you can prevent misuse, manage stock levels more effectively, and extend the lifespan of essential equipment.

Vend Requests

This feature provides strict control over vends, requiring an Administrator to pre-authorise a vend request. Once authorised, the user can enter a one-time code to vend the authorised items. Ad-hoc vending can also be enabled at the same time for items that do not require pre-authorisation.

Benefits: Stricter controls and pre-authorisation prevent over vending and only vending items that are required. Reducing costs and further preventing misuse.

Smart-V™ Configurations and Options

Configurations

- 55" UHD multi-touch display
- User interface, acts as a display screen when idle
- Customisable Screen
- Full vinyl wrapping
- Store up to 540 items

Delivery Methods

- Belt Conveyor
- Pusher Conveyor
- Spiral Conveyor
- Elevator for fragile stock

Dimensions

Width	Depth	Height	Weight
1188mm	925mm	1968mm	350kg

Authentication Options

RFID, NFC, barcode or QR code.

ONARKEN® Platform Management

ONARKEN® is the intelligent cloud-based platform that powers all LapSafe® Smart Lockers and vending machines. Bringing together every service, function, and user interaction into one powerful, easy-to-manage system.

Reporting and Audit Trails

Gain full visibility with ONARKEN®'s comprehensive reporting suite. Generate detailed reports on demand, display key statistics on the provided dashboard, or schedule automated email reports for timely updates. Data can be exported and visualised as graphs for easy analysis.

Benefits: Enhances decision-making, improves accountability, and provides real-time insights into asset usage and locker activity.

Security & Authentication

Enhance security with multiple identification methods, including RFID, NFC, QR code, Barcode and ONARKEN® digital passes. These passes can be downloaded to Apple Wallet and Google Wallet, providing a seamless and secure way for users to authenticate themselves at the lockers.

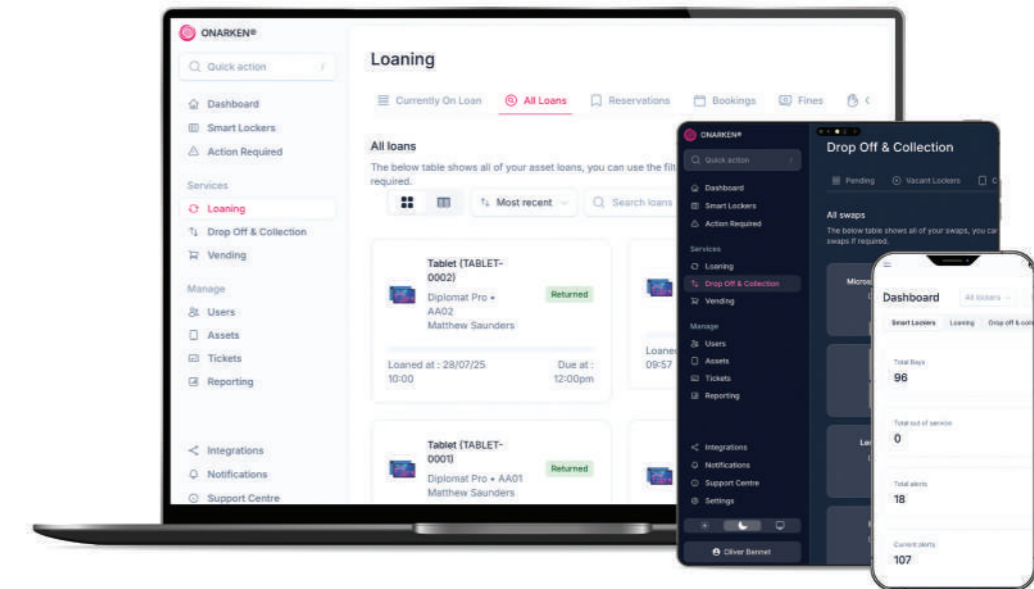

Each pass features a unique QR code linked to the user's ID badge for quick and easy access. For enhanced security, you can configure an additional layer of security by requiring users to enter a PIN code after scanning.

Benefits: Improves security, streamlines user access, and enhances convenience with digital authentication.

Integrations

Our comprehensive suite of APIs allows seamless integration with your existing systems, giving you full control over users, assets, groups, and services. Easily integrate ONARKEN® with third-party tools to streamline operations and enhance the user experience.

Benefits: Simplifies management, improves efficiency, and ensures a seamless workflow across your existing systems.

With ONARKEN®, your lockers become part of an integrated system that's easy to use, endlessly configurable, and built to grow with your organisation.

Planting Trees With Every Product

Plant-a-Tree

As part of our commitment to sustainability, LapSafe® will plant one tree for every trolley, locker tower or vending machine you buy.

Why It Matters

The UK needs to plant 1.5 billion trees by 2050 to meet legally binding net-zero targets.

By choosing LapSafe® you're not just investing in quality, future-proof technology, you're also making a measurable impact on the environment.

Supporting Our Customers

We'll keep track of how many trees are planted on your behalf and share updates as the project grows; Supporting biodiversity, cleaner air, and carbon capture. Helping you and your organisation reduce your carbon footprint.

Our Partners: Time4Trees

Led by land restoration specialists, Time4Trees turns underused and damaged land into thriving forests.

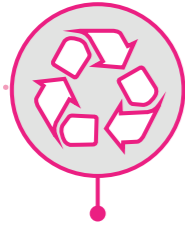

Their mission is to restore nature, improve air quality, and help the UK meet its climate goals, tree by tree.

“ We're proud to support British reforestation and help restore biodiversity. Giving our customers a simple but meaningful way to contribute to a more sustainable future with every purchase. ”
Denise Crouch, Marketing Director

Sustainability & Future Proofing

Environmental Management

LapSafe® is self-certified to ISO 14001:2015, recognising our commitment to minimising our environmental impact.

Made in Britain

A registered 'Made in Britain' company.

Built for Longevity

A future-proof, sustainable solution, designed to last with high-quality materials.

Plant A Tree

Each purchase supports our Plant-A-Tree initiative. See pg 14
